The present quantity of iron ore availability in the country, after export, is catering to the needs of the domestic steel industry. A study report of National Council of Applied Economic Research (NCAER), New Delhi in the year 2006, has found that the useful life of high and medium grade iron ore at average consumption level (average of current and projected consumption levels) is only 19 years.

(c) and (d) While consideration National Mineral Policy, 2008, the Group of Ministers had decided that conservation of iron ore resources of the country is of paramount importance, however, the same may not be achieved by banning or capping the export of iron ore but by taking recourse to appropriate fiscal measures. Accordingly, export duty at different rates was imposed on iron ore from time to time. At present, the rates of duty on iron ore export is following:-

(i) Iron ore fines (all sorts) — NIL

(ii) Iron ore other than fines (including lumps and pellets) — 5% ad-valorem
